As one who travels extensively for my job I am often taken into areas where radio reception is not readily available or clearly recieved. I subscribe to XM Radio and utilize their services almost 100% of the time while in my automobile. Local only radio supplied by NAB's stations do not provide the any thing close to the convenience of satellite radio for me as well as I venture to guess millions of subscribers.

I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I pay for, demand and deserve.
